Prime Time for the BRPA Seminar

This year's seminar has a feel of prime-time television about it, with kidnapping, forensics, a musical performance—and espionage thrown in for good measure.

The 2007 Braddock Road Preservation Association seminar commences with our highly successful Friday evening reception (November 2nd) at Wesley Hall from 7-9 p.m. The speakers and several vendors will be present, and light food and beverages will be served. This is your chance to meet Colonial-era scholars and enthusiasts, and beat everyone else to the best books and other rare materials offered by dealers. Dr. Jeffrey Schwartz, Professor of the Departments of Anthropology and History and Philosophy of Science at the University of Pittsburgh, presents this year's Friday keynote address, "What Did George Washington Really Look Like? The First Forensic Reconstruction of Our First President." Dr. Schwartz made national news by working with Jim Rees and Mount Vernon to recreate the face of Washington at key points in his life, and recounted this experience in the February 2006 issue of Scientific American in an article entitled, "Putting a Face on the First President."

Doors open at 8:30 on Saturday morning, November 3rd, for
